

“If you are renovating your kitchen and you need to know how big the space is for a new fridge you need to know how to measure the space accurately”- Lauren

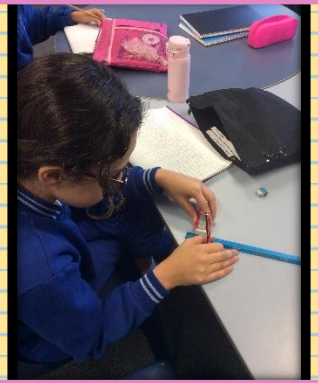

“You might need to measure a garden bed to see how many plants you can fit”- Megan

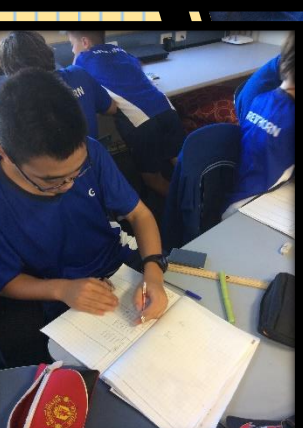

“If you are getting new furniture you need to know what fits”- Amanda

“If you are at a theme park you need to know how tall you are and if you reach the limit for the ride”- Adrian

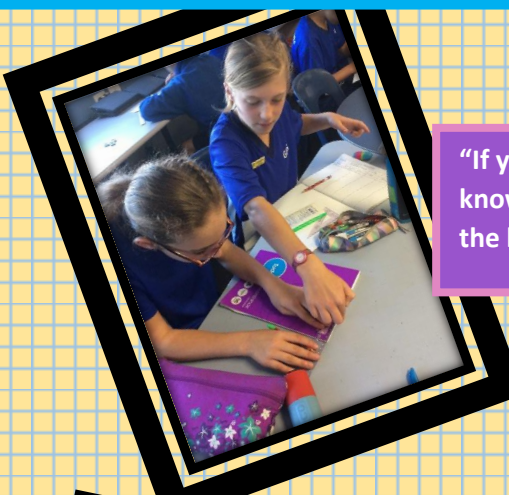

“It helps if you are buying a house and you understand how much land there is”- Zahara

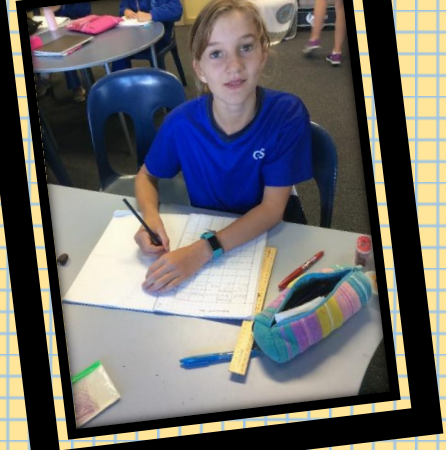

6MN have been **estimating** and **calculating** the **lengths, area** and **perimeter** of different objects in the classroom.

They have made sure their measurements were **accurate** and have compared their estimates to the actual values.

“It is good if you are going to a store to some construction and you need to know how much materials you need” – Flynn

“It helps if you are buying a house and you understand how much land there is”- Zahara
