

It has been another busy start to Term 2 for 412. In between House cross country, AFL9's Gala Day and (of course) camp, we have worked hard to build our knowledge and understandings around a range of topic areas. Earlier in the Term, while some of the Year 4's were at AFL9's, we celebrated Anzac Day with an Anzac Day fact hunt and produced a beautiful wreath.

In Science we started a new topic called 'Melting Moments' and have had some fun building a word wall and thinking about what happens to materials when we freeze them and heat them up.

We are building our confidence as independent, self-reflective learners by analysing our successes and challenges after learning sessions, using checklists and rubrics to monitor our progress and set goals for ourselves.
